

# CENTARI® **POWER IN PAINT**

AN AXALTA COATING SYSTEMS BRAND

# BUILT-IN PRODUCTIVITY

**Centari® is the low-solvent paint technology from Cromax®. It is designed to provide bodyshops with a high-quality finish and to allow them to work faster, more efficiently and more economically. Don't waste time, effort, money or resources.**

**CHOOSE CENTARI®**  
THE SIMPLE  
SOLUTION.

## FOR EVERY APPLICATION

Whether you need a direct gloss or clear-over-base system, Centari® is incredibly flexible. It allows you to mix a wide range of solventborne paint qualities - from medium to high solids, and topcoats to basecoats - for virtually any application. All it takes is a single mixing machine, one set of Centari® MasterTints® and the right binder. Then you're set up for any colour and any effect. Stock management couldn't be easier.

## FOR EVERY COLOUR

One system, one set of tints – and over 200,000 colour formulas in solid, metallic and pearlescent finishes. Add in powerful, fast colour measurement and matching tools and you have everything you need to identify and to mix any colour, in no time.

## FOR EVERY USE

The unique, patented Centari® polymer technology makes it very easy to use and quick to dry in any quality. In just two coats, Centari® gives refinishers the coverage they need for most paint jobs. That means each job can be finished more quickly and more easily. And for bodyshops, throughput is the name of the game.

## CENTARI® MASTERTINTS

### TWO BASECOAT QUALITIES

#### CENTARI® 6000

Use this medium solids, low emission, solventborne basecoat for solid, metallic and pearl colours in clear-over-base applications. We've formulated it to dry quickly, provide excellent coverage and hiding, and made it easy to use. That makes it the economical choice for high quality, efficient refinish jobs.

##### KEY CHARACTERISTICS

- Great versatility makes it suitable for spot, panel and overall repairs
- Fast drying times mean greater throughout
- Excellent hiding and coverage save time and materials
- Outstanding mottling control makes for easy application
- Brilliant appearance in clear-over-base systems

#### CENTARI® 600

This effective basecoat is easy to apply, provides good coverage and dries fast. Suitable for spot, panel and overall repairs, as well as custom jobs, Centari® 600 can be used for all solid, metallic and pearl clear-over-base applications.

##### KEY CHARACTERISTICS

- Quick air drying times cut application time
- Good coverage at low film thickness reduces paint consumption
- Outstanding colour performance
- Excellent mottling and perfect flake control make it easy to apply
- A wide application window means it's suitable for spot, panel and overall repairs

# ALL IN ONE VERSATILITY

With Centari® , we've made things simple. Whatever the size of the repair, the type and colour of the vehicle, the application conditions – Centari® is all you'll need. Designed to be labour-, cost- and time-saving, our unique mixing machine, with interchangeable components, allows you switch paint quality by just using a different binder with the right thinner or activator for the job. That makes paint preparation easy and economical. It also means you can prepare a wide range of different paint qualities and colours with very little stock investment. With Centari® , you're always prepared.

## TWO TOPCOAT QUALITIES

### CENTARI® 5035

This ultra-high solids topcoat is based on patented star polymer technology from the Cromax® brand to provide a long lasting, outstanding finish. Its excellent hiding and coverage properties mean you use less material and save time on each job. Centari® 5035 is the ideal 2K topcoat for ultimate productivity while meeting existing VOC emission legislation

#### KEY CHARACTERISTICS

- Easy to use; minimal application training required
- Fast drying for quicker throughput
- Excellent hiding and coverage to save you time
- Fully VOC compliant
- Suitable for spot, panel and overall repairs

### CENTARI® 500

A general-purpose industry favourite, this 2K high-gloss topcoat system is ideal for all solid and single layer metallic applications. It offers outstanding hiding qualities and is quick to dry. Use it for spot, panel or overall repairs for a complete and durable finish.

#### KEY CHARACTERISTICS

- Excellent durability make it ideal for use on buses, trucks and metal furniture
- Very good hiding properties reduce paint consumption
- Fast drying times
- A wide application window make it suitable for spot, panel and overall repairs
- Outstanding, high-gloss appearance due its acrylic copolymer base

# COLOUR BACK-UP

Don't waste time on complicated colour matching processes.

Get the perfect colour match every time - and quickly - by using one of the Cromax® brand's colour tools. Whether you prefer traditional methods or want the latest automated device, we have the right colour tools to find the correct colour formulation quickly.

01

## CHROMAVISION®

The most productive colour retrieval tool from Cromax® - the ChromaVision® spectrophotometer - measures vehicles' paint colours and then selects the colour formula based on pre-set search criteria entered by the refinisher.

02

## CHROMAVISION® PRO

ChromaVision® Pro is the powerful second-generation spectrophotometer from Cromax®. The new software which powers ChromaVision® Pro takes colour matching accuracy to another level. Refinishers can measure the colour and the effect, directly on the device, in one easy step.

03

## CENTARI® FAN DECK

The Centari® Fan Deck consists of colour chips for passenger car colours. Each chip is sprayed with Centari® products to ensure excellent colour accuracy.
